

Item 7113588

The Loke 75/110 Vertical floor drain has a dual vertical outlet with dimensions of 75mm and 110mm; as well as three extra inlets. Only one of the extra inlets should be used. The floor drain is suitable for installation in wooden or concrete joists. The Loke floor drain comes complete with a removable water trap with splash guard, clamping ring and plastic grate. It also comes with a protective cover that is intended to prevent any concrete or debris from installation from entering the drain. When installing the Loke floor drain with the Purus Plate (2014 model), the extension ring should not be used.

The automatic clamping ring is used for both sealing membrane and vinyl flooring. It is a self-adjusting clamping ring for vinyl flooring with a thickness of 1,5 mm to 2 mm.
