

Item 8037905

Purus’ V55 Plaster Separators in stainless steel for installation under a sink, workbench, or wash trough. Designed to prevent sedimentation of substances such as plaster, clay and sand, which may otherwise clog drainage pipes if discharged into the sewer system. Ideal for hospitals and healthcare environments, such as dental clinics or laboratories, as well as schools and ceramic workshops.

The drain tap on the container makes it easy to empty the water before removing the separated material that has accumulated at the bottom of the plaster separator. The 11-litre container can be easily detached for emptying and cleaning. The clamp that secures the container keeps it odour-free when locked and also functions as a handle.

Mounted with wall brackets and connected with a G40 internal thread at the inlet and a G40 external thread at the outlet.

Specifications

Item Number	8037905
Dimension	G40
Electrical Data	11 l
Function	Console mounting

Item Color	Stainless
Material	PP, EPDM, Stainless steel 1.4301
Pressure Flow Temp	1,5 l/s
Size	360x370x430 mm
Surface	Gloss-polished
Version	Internal x external thread
