

Item 8037905

Purus' V55 Plaster Separators are designed to stop the deposition of substances such as plaster and sand, which are often flushed through the outlet and block the sewer pipe. These are usually placed in connection with stainless steel workbenches and laundry chutes. Solid particles are separated from the water and are held back in the bottom of the bucket, which can then be removed for emptying and cleaning. The V55 Plaster Separators are often used in hospitals, dental surgeries, art facilities, art colleges and universities.

Specifications

Item Number	8037905
Dimension	G40
Electrical Data	11 l
Function	Console mounting
Item Color	Stainless
Material	PP, EPDM, Stainless steel 1.4301
Pressure Flow Temp	1,5 l/s
Size	360x370x430 mm
Surface	Polished
Version	Internal x external thread
