

Item 8573425

The PUM vertical waste outlet is a combination of a vertical waste and a water trap for wash basins with G32 connections. The odour barrier (membrane) is integrated in the vertical waste and is positioned under the lid, which can easily be lifted up for in situ cleaning and maintenance. The vertical waste replaces the usual cup-style water trap, saving space underneath the wash basin. It can be combined with floor and wall outlet kits which do not have a conventional water trap. This PUM vertical waste outlet has a connection for overflow drains.

Specifications

Item Number	8573425
Function	To washbasin
Item Color	Chrome
Material	Brass, Silicone, PP
Outlet Dimension	G32
Pressure Flow Temp	0,6 l/s
Surface	Chromed brass
Version	With odor trap and overflow
