

Item 855709

Purus channel 100 modul T-cross 65 is a floor channel made of acid-resistant stainless steel for installation in concrete. The floor channel is intended for concrete, epoxy and tile floors without a waterproofing membrane. The floor channel is 100 mm wide and has a built-in fall of which the height is 65 mm and length 500×500 mm. The floor channel is delivered with gasket and screw connection for installation but needs to be supplemented with grid depending on the environment and outlet house. The total height with screw joints is 129 mm.

Item 855710

Purus channel 100 modul T-cross 80 is a floor channel made of acid-resistant stainless steel for installation in concrete. The floor channel is intended for concrete, epoxy and tile floors without a waterproofing membrane. The floor channel is 100 mm wide and has a built-in fall of which the height is 80 mm and length 500×500 mm. The floor channel is delivered with gasket and screw connection for installation but needs to be supplemented with grid depending on the environment and outlet house. The total height with screw joints is 129 mm.

Item 855711

Purus channel 100 modul T-cross 95 is a floor channel made of acid-resistant stainless steel for installation in concrete. The floor channel is intended for concrete, epoxy and tile floors without a

waterproofing membrane. The floor channel is 100 mm wide and has a built-in fall of which the height is 95 mm and length 500×500 mm. The floor channel is delivered with gasket and screw connection for installation but needs to be supplemented with grid depending on the environment and outlet house. The total height with screw joints is 129 mm.

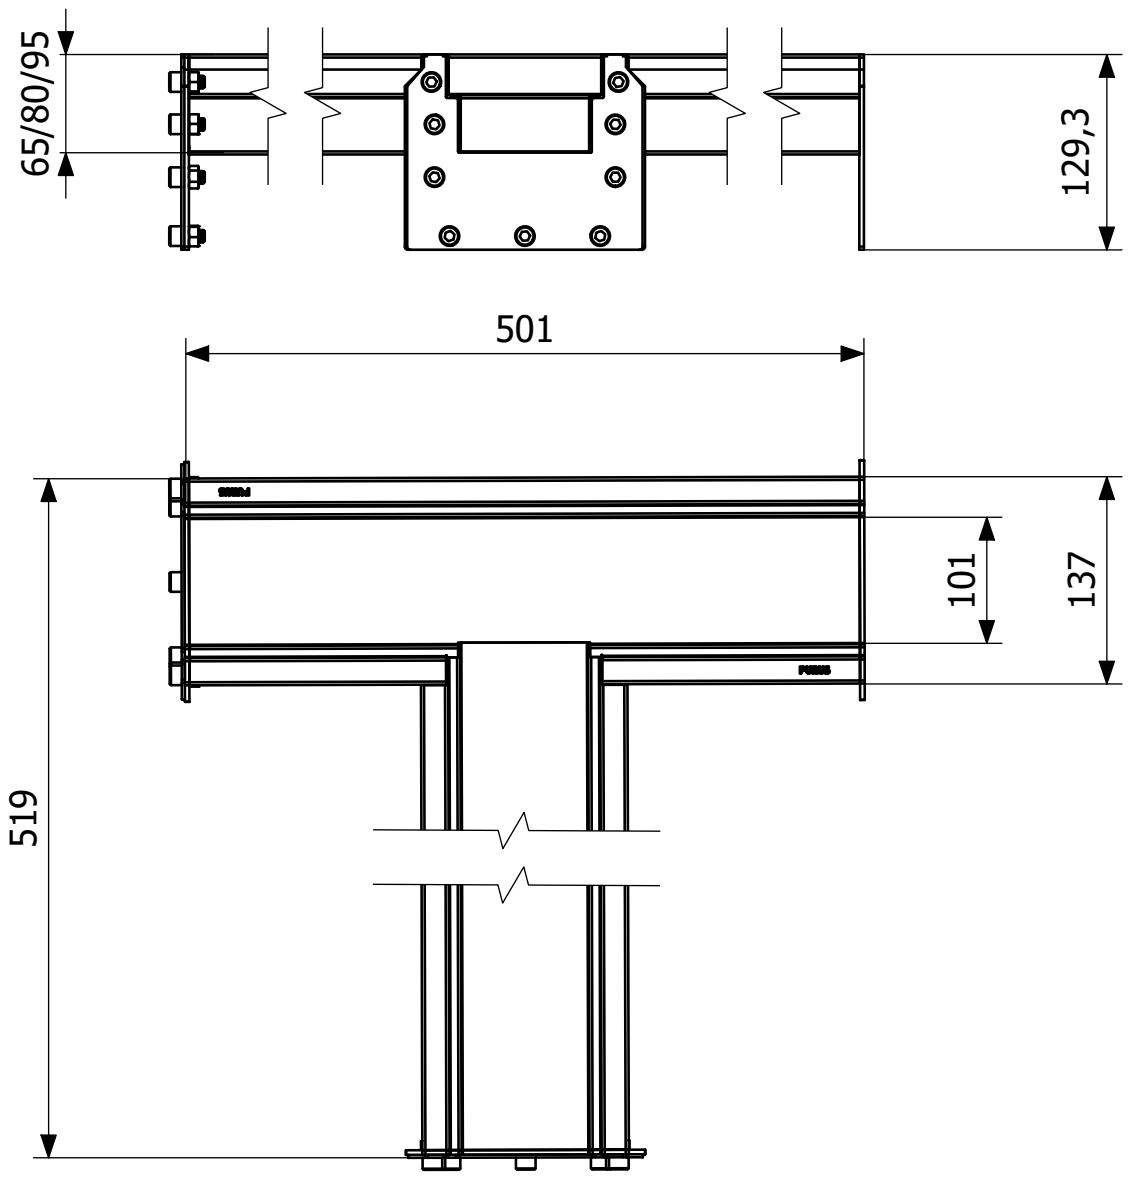

Specifications

Item Number	855709
Dimension	Side/bottom in stainless steel in Ø75/Ø110 mm
Floor Construction	Concrete flooring
Floor Covering	Concrete
Function	With slope
Item Color	Stainless
Material	Acid-resistant stainless steel 1.4404
Size	500x500x100 mm
Surface	Pickled
Version	Do not forget grid/grating

Item Number	855710
