

Item 856660

Purus channel 150 is a channel made of acid-resistant stainless steel for installation in concrete floors. The channel has a central outlet and is intended for tiled floors as a surface layer. Supplement with gully base in plastic or acid-resistant stainless steel and mesh grate for higher load classes or grating for K3 (300 kg) load.

Item 856661

Purus channel 150 is a channel made of acid-resistant stainless steel for installation in concrete floors. The channel has a central outlet and is intended for tiled floors as a surface layer. Supplement with gully base in plastic or acid-resistant stainless steel and mesh grate for higher load classes or grating for K3 (300 kg) load.

Item 856662

Purus channel 150 is a channel made of acid-resistant stainless steel for installation in concrete floors. The channel has a central outlet and is intended for tiled floors as a surface layer. Supplement with gully base in plastic or acid-resistant stainless steel and mesh grate for higher load classes or grating for K3 (300 kg) load.

Item 856589

Purus channel 150 is a channel made of acid-resistant stainless steel for installation in concrete floors. The channel has a central outlet and is intended for tiled floors as a

surface layer. Supplement with gully base in plastic or acid-resistant stainless steel and mesh grate for higher load classes or grating for K3 (300 kg) load.

Item 856590

Purus channel 150 is a channel made of acid-resistant stainless steel for installation in concrete floors. The channel has a central outlet and is intended for tiled floors as a surface layer. Supplement with gully base in plastic or acid-resistant stainless steel and mesh grate for higher load classes or grating for K3 (300 kg) load.

Item 856653

Purus channel 150 is a channel made of acid-resistant stainless steel for installation in concrete floors. The channel has a central outlet and is intended for tiled floors as a surface layer. Supplement with gully base in plastic or acid-resistant stainless steel and mesh grate for higher load classes or grating for K3 (300 kg) load.

Item 856654

Purus channel 150 is a channel made of acid-resistant stainless steel for installation in concrete floors. The channel has a central outlet and is intended for tiled floors as a surface layer. Supplement with gully base in plastic or acid-resistant stainless steel and mesh grate for higher load classes or grating for K3 (300 kg) load.

Item 856655

Purus channel 150 is a channel made of acid-resistant stainless steel for installation in concrete floors. The channel has a central outlet and is intended for tiled floors as a surface layer. Supplement with gully base in plastic or acid-resistant stainless steel and mesh grate for higher load classes or grating for K3 (300 kg) load.

Item 856656

Purus channel 150 is a channel made of acid-resistant stainless steel for installation in concrete floors. The channel has a central outlet and is intended for tiled floors as a surface layer. Supplement with gully base in plastic or acid-resistant stainless steel and mesh grate for higher load classes or grating for K3 (300 kg) load.

Item 856657

Purus channel 150 is a channel made of acid-resistant stainless steel for installation in concrete floors. The channel has a central outlet and is intended for tiled floors as a surface layer. Supplement with gully base in plastic or acid-resistant stainless steel and mesh grate for higher load classes or grating for K3 (300 kg) load.

Item 856658

Purus channel 150 is a channel made of acid-resistant stainless steel for installation in concrete floors. The channel has a central outlet and is intended for tiled floors as a surface layer. Supplement with gully base in plastic or acid-resistant stainless steel and mesh grate for higher load classes or grating for K3 (300 kg) load.

Item 856659

Purus channel 150 is a channel made of acid-resistant stainless steel for installation in concrete floors. The channel has a central outlet and is intended for tiled floors as a surface layer. Supplement with gully base in plastic or acid-resistant stainless steel and mesh grate for higher load classes or grating for K3 (300 kg) load.

Specifications

Purus channel 150 is a channel made of acid-resistant stainless steel for installation in concrete floors. The channel has a central outlet and is intended for tiled floors as a surface layer. Supplement with gully base in plastic or acid-resistant stainless steel and mesh grate for higher load classes or grating for K3 (300 kg) load.

Item Number	856660
Dimension	Bottom/side in plastic or stainless steel in Ø50, Ø75 or Ø 110 mm
Floor Construction	Concrete flooring
Floor Covering	Tile floor with glueing flange
Function	Central outlet
Item Color	Stainless
Material	Acid-resistant stainless steel 1.4404
Size	800×150 mm
Surface	Pickled
Version	Do not forget grid/outlet house

Item Number	856661
Dimension	Bottom/side in plastic or stainless steel in Ø50, Ø75 or Ø 110 mm
Floor Construction	Concrete flooring
Floor Covering	Tile floor with glueing flange
Function	Central outlet
Item Color	Stainless
Material	Acid-resistant stainless steel 1.4404
Size	1000×150 mm
Surface	Pickled
Version	Do not forget grid/outlet house

Item Number	856662
Dimension	Bottom/side in plastic or stainless steel in Ø50, Ø75 or Ø 110 mm
Floor Construction	Concrete flooring
Floor Covering	Tile floor with glueing flange
Function	Central outlet
Item Color	Stainless
Material	Acid-resistant stainless steel 1.4404
Size	1200×150 mm

Surface	Pickled
Version	Do not forget grid/outlet house
Item Number	856589
Dimension	Bottom/side in plastic or stainless steel in Ø50, Ø75 or Ø 110 mm
Floor Construction	Concrete flooring
Floor Covering	Tile floor with glueing flange
Function	Central outlet
Item Color	Stainless
Material	Acid-resistant stainless steel 1.4404
Size	500×150 mm
Surface	Pickled
Version	Do not forget grid/outlet house
