

Item 7113765

Plastic NOOD water trap for Purus’ Minimax 50 and Minimax Two Part floor gullies. The NOOD no-odour water trap is a mechanical odour stop designed to close when there is no water flow, thus preventing odours from escaping through the drain, even when dried out. It is therefore suitable for environments which have little or no water supply for longer periods of time. When water is flowing through, the water trap opens automatically. It can be removed from the outlet gully for easy cleaning and maintenance.
